## 2022 퍼블리셔 부트캠프 019

## - EJS Tag, toLocaleDateString('ko-KR', options);

## !Tips & Links

- ※ 강의 https://www.udemy.com/course/the-complete-web-development-bootcamp/
- X EJS https://ejs.co/#docs Using EJS w Express https://github.com/mde/ejs/wiki/Using-EJS-with-Express
- X Format a javascript Date https://stackoverflow.com/questions/3552461/how-to-format-a-javascript-date

```
mkdir project 안에 touch index.html app.js / npm init하고 npm i express body-parser ejs

### app.get('/', function(req, res){
## res.send('Hello, world!');

### sons to bodyParser = require('express');
### const express = require('express');
### const bodyParser = require('body-parser');
### const app = express();

### app.use( bodyParser.urlencoded ({extended: true}) ); *** req.body.인풋이름**
```

- ※ <u>한글 깨짐</u>: res.writeHead(200, {'Content-Type': 'text/html;charset=UTF-8'}); // UTF-8설정
- ※ app.js에서 console.log는 터미널(서버)에 표기

EJS :

Embedded JavaScript template // ejs에 <% %>랑 <%= %>구분 잘하기 !!!! views 폴더 안에 index.ejs // ejs파일 ☞ html코드 + <%= 이름 %> <% js %>

| <% Tag %> |   |       |             |
|-----------|---|-------|-------------|
| <% %>     | Scriptlet tag, for control-flow, no output // add each line // <% line by line basis %> |       |             |
|           | use scriptlet tag for select situations: modifying content based on variable, etc       |       |             |
| <%= %>    | Outputs the value into the template (HTML escaped)                                      |       |             |
| <%# %>    | Comment tag / no execution, no output   |       |             |
| <%%>      | Whitespace Slurping Scriptlet tag, strips all whitespace before & after it              |       |             |
| <%-       | Outputs the <u>unescaped value</u> into the template                                    | .0/0/ | output '0/' |
| -%>       | Trim-mode ('newline slurp') tag, trims following newline                                | <%%   | output '%'  |

```
toLocaleDateString : 한글ver ☞ date.toLocaleDateString('ko-KR', options); ☞ 2022년 3월 10일 목요일 let options = { weekday: 'long', year: 'numeric', month: 'long', day: 'numeric' };
```
